Re: Proposed Water Service to the NH 1,4 Dioxane Contamination Site located in Atkinson, NH

Dear John,

The purpose of this letter is to outline the general terms and conditions under which Hampstead Area Water Company, Inc. (HAWC) would provide the aforementioned project with potable water.

Please be advised that HAWC is willing and able to provide water service for residential use. Providing water service is subject to the following items:

1. The EPA completing the necessary water main extension contract and having the required water mains and services installed in accordance with our technical specifications and HAWC's NH Public Utilities Commission (NHPUC) Tariff.
2. HAWC executing and submitting an application to the NHPUC for franchise approval and application of rates for this service area. Please note providing service is contingent on HAWC receiving NHPUC approval.
3. Provide any necessary easements (This will only be necessary where water lines may cross private property)
4. The EPA providing a \$1,500.00 capacity development payment per lot connected.

HAWC will own, operate, and maintain the water mains and water services (from the mains to the curb stops) running to the project. Please note for fire protection to meet the demands of specific projects, additional system upgrades may be necessary.

If you have any questions or comments, please contact me at 603.362.4299 or by email at charlie@hampsteadwater.com.

Sincerely,

Charles Lanza, Project Manager
Hampstead Area Water Company, Inc.
